On the FmX® integrated display, all buttons can be programmed.

Programming the buttons and the LED brightness

EZ-Guide 250 or EZ-Guide 500 system

Note: *Cable with CAN terminator (P/N 67094-00) is required.*

Programming buttons 1-4

1. Select *Configuration* / *System* / *EZ-Remote* / *EZ-Remote Keypad Assignment Wizard*.
2. Select the required function to assign to buttons 1-4 and then press **OK** on the display, or press the trigger button on the joystick.

Adjusting LED brightness

1. Select *Configuration* / *System* / *EZ-Remote* / *EZ-Remote LED Brightness.*
2. Use the slider bar to adjust the brightness of the LED lights on the joystick.

Viewing button assignments and joystick details

Select *Configuration* / *Status* / *EZ-Remote Status*. This screen shows details about your EZ-Remote joystick and the functions that are currently assigned to buttons 1-4.

FmX integrated display

Note: *Cable (P/N 72420) is required.*

Programming buttons

1. In the *Display Setup* screen, select *External Keypad* and then tap **Setup**. The *Keypad Assignment* screen appears.
2. On the EZ-Remote joystick, press the first button you want to program. On the FmX display, tap the feature you want to assign. Tap **Set** and then tap **OK**.
3. Repeat Step 2 for each button.

Adjusting LED brightness

In the *Keypad Assignment* screen, use the slider bar to adjust the brightness of the LED lights on the EZ-Remote joystick.

Installing the EZ-Remote joystick

Standard mount

1. Select a mounting location on the console of your tractor cab. When mounted, the EZ-Remote joystick should be in a location that the operator can comfortably reach.
2. Install the EZ-Remote joystick using the supplied RAM mount and hardware.

Optional extended mount (P/N 80104)

If you do not have space on your console, or do not want to attach the RAM mount to your console, an extended mount is available for purchase.
